ABOUT ME

I am a sociable and open-minded individual with a strong passion for systematic understanding of information. I am committed to practicing daily and continually striving to become the best version of myself. My dedication to personal and professional growth is evident in my proactive approach to learning and development. I enjoy spending time with friends, meeting new people, and sharing experiences. This sociable nature not only enriches my personal life but also enhances my communication and collaboration skills.

WORK EXPERIENCE

05/07/2023 – CURRENT Iasi, Romania

FULL-STACK DEVELOPER BEENEAR

Responsibilities:

- Developed the user interface for the goods tracking application using Angular.
- Implemented backend functionalities for goods tracking with Spring Boot.
- Contributed to refining requirements and was actively involved in the testing and final implementation of the solution.
- Conducted code reviews for colleagues.
- Provided suggestions to improve the application's performance.
- Created unit tests using JUnit 5 and integration tests with TestContainers and Docker.
- Worked with a monolithic architecture based on a single-tenant model.
- Wrote HQL and native SQL queries to optimize data retrieval and improve performance. The database used was Oracle.

Business or Sector Transportation and storage

04/11/2022 – 05/03/2023 Iasi, Romania

JAVA DEVELOPER BEENEAR

Responsibilities:

- I worked on a project focused on managing goods and warehouse movements.
- I created APIs for various use cases and tested them using Swagger.
- Used Spring Data JPA to create basic queries.
- I utilized Azure Blob Storage to save images.
- Also developed and managed persistence support at the entity and repository levels, facilitating communication between Hibernate and the database. The database used was Microsoft SQL Server.

Business or Sector Transportation and storage

05/09/2022 – 05/11/2022 Iasi, Romania

INTERNSHIP JAVA DEVELOPER BEENEAR

Responsibilities:

- I learned basic Java concepts.
- During the internship, I developed an online store based on a microservices architecture using Spring Boot.
- Communication between microservices was handled via REST API.

- I used the following libraries and frameworks for the project: WebClient, Spring Data JPA, Lombok, Spring Security, Spring Actuator, and Spring Cloud.
- The database used was PostgreSQL, and database changes were versioned with Liquibase.

Business or Sector Other service activities

06/2021 – 02/10/2021 Nea Moudania, Greece

WAITER WITH ERASMUS+ PORTHES LUXURY RESORT

- I participated in the Erasmus+ program, gaining valuable experience in Greece. Although it was challenging, it significantly enhanced my communication skills.
- I improved my English by working with the staff and interacting with new people.
- I collaborated with a team to deliver an exceptional experience for our customers.

Business or Sector Arts, entertainment and recreation | **Website** <https://porteslithos.gr/>

● **EDUCATION AND TRAINING**

09/2022 – 07/2024 Iasi, Romania

SOFTWARE DEVELOPMENT AND BUSINESS INFORMATION SYSTEMS Faculty of Economics and Business Administration

Website <https://www.feaa.uaic.ro/programe-de-masterat/m-sia/>

10/2019 – 06/2022 Iasi, Romania

ECONOMIC INFORMATICS Faculty of Economics and Business Administration

Website <https://www.feaa.uaic.ro/programe-de-licenta/ie/>

● **PROJECTS**

06/2023 – 01/07/2024

Dissertation Project

I have developed a web application as part of my thesis, designed exclusively for driving schools. The application can manage multiple schools simultaneously for a school administrator. It features various types of roles, with each user having customizable permissions within the application. The application includes a series of CRUD functionalities and a dashboard for monitoring instructor performance and sales reports.

Key points:

- High level of security through the use of the JWT standard for securing endpoints.
- Used Spring Boot and Angular as main technologies.
- Frontend: HTML5, SCSS, **TypeScript**, **Angular**, **PrimeNG**, NG-Bootstrap, s.a.
- Backend: **Java 17**, **Spring Boot 3.2**, Spring Security 6, JSON **WebToken**, Spring, Data JPA, WebSocket, **Test Containers**, Lombok, **MapStruct**, s.a.
- Controlul versiunilor și colaborare: Git, Github
- Database: Postgres 16
- Additional tools: **Docker** for testing, **Heroku** for deploy.

03/2023 – 06/2023

Warehouse Project

I have developed a product management application for a warehouse that includes handling quantities, managing employees and users, sending emails, and creating invoices. Additionally, I have performed a series of CRUD operations.

- Used Spring Boot and Vaadin as main technologies.
- Backend: **Java 11**, **Spring Boot 2.7**, Spring Security 5, Spring, Data JPA, Lombok, s.a.

- Controlul versiunilor și colaborare: Git, Github
- Database: Postgres 14

05/05/2022 – CURRENT

Various Projects

Since starting my career as a junior developer, I have worked on **numerous personal projects** driven by a desire to gain a deeper understanding of web application development, particularly with Spring Boot. I am an enthusiastic individual who stays current with the latest technology trends, and my curiosity continually motivates me to explore new and innovative solutions.

I have attached a link to one of my GitHub repositories where you can find a list of my most recent projects.
