

Andrei-Cosmin Chelariu

Date of birth: 16/10/2000 | **Place of birth:** Romania | **Nationality:** Romanian | **Gender:** Male | **Phone:** (+40) 742929995 (Home) | **Email address:** chelariu.cosmin@yahoo.com | **Website:** <https://andreichelariu.vercel.app/> | **LinkedIn:** [andrei-chelariu-8a7a86204](#) | **Address:** Iasi, Romania (Home)

ABOUT ME

Senior Software Engineer with hands-on experience building and maintaining cloud-native Java microservices on GCP and Kubernetes for a large-scale platforms. Hands on experience with Terraform, performance and load testing and improving system resilience under peak traffic. Also work with latest technologies and apply agentic engineering to real backend systems. Enjoy mentoring engineers and students, and collaborate closely through pair programming, code reviews and knowledge-sharing.

WORK EXPERIENCE

ACCESA - ROMANIA

SENIOR SOFTWARE ENGINEER 01/02/2026 - CURRENT

Main activities and responsibilities:

- Contributing to the ground-up rewrite of a legacy system, designing and building new backend services from scratch
- Developing high-volume batch data import pipelines using JBeret on Quarkus, focused on efficiency, resilience and high availability
- Building and maintaining cloud infrastructure on GCP using Terraform and Kubernetes (K8s)
- Setting up CI/CD pipelines with GitHub Actions
- Working with Oracle and PostgreSQL databases, including data migration and query optimisation
- Collaborating with cross-functional teams on API design and integration
- Participating in code reviews, testing and technical decision-making

Technologies: Java, Quarkus, JBeret, Oracle, PostgreSQL, GCP, Kubernetes, Terraform, GitHub Actions, React

MENTOR 01/09/2025 - CURRENT

New joiners (Internship)

Main activities and responsibilities:

- Onboarded new team members into agile delivery, covering sprint practices, task estimation and technical decision-making
- Provided day-to-day technical guidance and unblocked mentees on design and implementation questions
- Conducted code reviews focused on clean code, maintainability and industry best practices
- Continuously deepened my own knowledge of system design and software principles, and passed it on to the team

Technologies: Java, PostgreSQL

Mentor: Summer Mentorship Program, DPIT (high-school students)

Main activities and responsibilities:

- Introduced high-school students to IT, starting with the **product mindset**: understanding users, their problems and how to solve them before writing any code
- Guided students end-to-end through a real project: requirements, **database schema design**, **backend** and **frontend** implementation
- Demonstrated how programming languages and frameworks work through **real-world application examples**
- Encouraged independent problem-solving and built students' confidence through hands-on practice
- *Defined clear learning goals and broke the project into achievable milestones
- *Gave regular, constructive feedback on students' work and code
- *Ran live-coding and pair-programming sessions to demonstrate good practices
- *Adapted explanations to each student's pace and level
- *Introduced basic engineering habits: version control, readable code and simple documentation

Technologies: Python, PostgreSQL, Flutter

Contact: <https://dpit.ro/>

SOFTWARE ENGINEER 24/03/2025 - 30/01/2026

Retail project (June 2025 – present)

Main activities and responsibilities:

- Maintain **9 microservices** running on **GCP (Kubernetes)**, part of an in-store sales platform used by retail sales associates to place orders, browse products and speed up customer interactions
- Deliver new features end-to-end on a platform used daily by sales associates across **thousands of stores**
- Plan and run **load and stress tests** to prepare the system for peak season, and identify and fix bottlenecks.
- Reduced pod memory consumption by fixing resource leaks (try-with-resources) and lowering object allocation (primitives instead of boxed types), improving stability under peak load
- Optimised Docker images using multi-stage builds, JRE-only runtime and efficient layering, resulting in smaller images and faster deployments
- Audit the architecture and propose resilience improvements for high-traffic periods
- Manage infrastructure as code with **Terraform**

Technologies: Java, Spring Boot, Kubernetes, GCP, Terraform

BEENEAR - IASI, ROMANIA

Business or sector Transportation and storage

FULL-STACK DEVELOPER 05/07/2023 - 14/03/2025

Responsibilities:

- Developed the user interface for the goods tracking application using Angular.
- Implemented backend functionalities for goods tracking with Spring Boot.
- Participated in the full Software Development Life Cycle (SDLC), from requirements analysis and development to testing, release.
- Conducted code reviews and provided technical feedback to improve code quality and maintainability.
- Identified and implemented application performance improvements.
- Developed unit tests with JUnit 5 and integration tests using Testcontainers and Docker.
- Worked with a monolithic, single-tenant architecture.
- Wrote HQL and native SQL queries to optimize data retrieval and improve performance. (Oracle)

JUNIOR SOFTWARE DEVELOPER 04/11/2022 - 05/03/2023

Responsibilities:

- Developed REST APIs for warehouse and goods movement management.
- Implemented persistence using Spring Data JPA, Hibernate, and Microsoft SQL Server.
- Designed and managed entities and repositories for database interaction.
- Integrated Azure Blob Storage for image storage.
- Tested and documented APIs using Swagger/OpenAPI.

INTERNSHIP JAVA SOFTWARE DEVELOPER 05/09/2022 - 05/11/2022

Responsibilities:

- Developed an e-commerce application using a microservices architecture with Spring Boot.
- Implemented REST-based communication between microservices and an API Gateway using Spring Cloud.
- Applied OOP, SOLID principles, Dependency Injection, and common design patterns in a microservices context.
- Used Spring Data JPA and Hibernate, applying best practices for entity mapping and persistence.
- Worked with Spring Security, WebClient, Spring Actuator, Lombok, and Spring Cloud.
- Used PostgreSQL with Liquibase for database schema versioning and migrations.

EDUCATION & TRAINING

24/03/2025 - 29/05/2026 - ROMANIA

KOTLIN ACADEMY - ACCESA

Main activities and responsibilities:

- Built several hands-on projects to following idiomatic Kotlin and Kotlin Multiplatform
- Implemented **coroutines** and **asynchronous database access**
- **Built an event-driven flow with RabbitMQ**, updating stock in real time after order creation
- Implemented **multi-tenant isolation** with **Keycloak** (realms, identity management)
- Shared knowledge through **knowledge-transfer sessions**, **pair programming** and **code reviews**

Technologies: Kotlin, Ktor, Koin, RabbitMQ, Keycloak

09/2022 - 07/2024 - IASI, ROMANIA

SOFTWARE DEVELOPMENT AND BUSINESS INFORMATION SYSTEMS- FACULTY OF ECONOMICS AND BUSINESS ADMINISTRATION

ECONOMIC INFORMATICS- FACULTY OF ECONOMICS AND BUSINESS ADMINISTRATION

LANGUAGE SKILLS

Mother tongue(s): ROMANIAN

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B1	B1	B1

SKILLS

Technical skills

Spring | Security | Quarkus | system integrations | Terraform | REST APIs | Java | Kubernetes | Relational & Non-Relational databases | root cause analysis | Git | system design | LLMs | CI/CD | RAG | MCP | Agentic AI

Communication skills

teamwork principles | constructive feedback | Empathy and Conflict Resolution | clear communication with technical and non-technical stakeholders

Organisational skills

prioritise requests | Time management | attend to detail | end-to-end project delivery
